Introduction

Welcome!

We're thrilled to have you join us at Cal Hacks 13.0 this weekend! All of us are super excited to kick off our thirteenth iteration of Cal Hacks, and you all are the driving force behind our event. We want to do everything we can to help you navigate Cal Hacks; with that said, please be sure to read through the entire guide!

This year, Cal Hacks is taking place in San Francisco at the Palace of Fine Arts! In this guide, you'll find resources for navigating the venue and surrounding area, as well as an itinerary of the workshops, ceremonies, and events we'll be hosting!

Whether Cal Hacks is your first hackathon or your fiftieth, what we believe makes hackathons so valuable are the endless opportunities to learn. Cal Hacks wouldn't be possible without the support from our community, from our incredible sponsors and mentors to our volunteers from across the nation. With their support, we're excited to provide you with the resources you need to build out your projects from ideation to reality. We encourage you to check out our workshops, brought to you by our sponsors and Berkeley student organizations, and to reach out to our mentors — there's no better way to discover new ways to build!

What truly makes Cal Hacks special, though, is you. Each hacker brings a wealth of unique experiences and ideas; it's your curiosity, creativity, and love for building that drives us to put on this event. Whether you come to San Francisco with a team or discover one when you arrive, the best ideas are formed from creative minds coming together to build something incredible. The projects that come out of Cal Hacks never fail to amaze; you inspire us every day to make Cal Hacks the best it can possibly be. Thank you so much for coming — we can't wait to see what you build.

Happy hacking!

Sincerely,
The Hackathons @ Berkeley Team <3

General Info & Venue

Important Links

- ➔ Schedule & Live Updates: coming soon!
- ➔ Slack: hackberkeley.org/slack
- ➔ Devpost: cal-hacks-13-0.devpost.com
- ➔ "Hackathons @ Berkeley" on the App Store or Play Store

Directions & Maps

Cal Hacks 13.0 will take place at:

Palace of Fine Arts
3601 Lyon St, San Francisco, CA 94123

The Palace of Fine Arts is located in the Marina District of San Francisco, near Crissy Field and the Presidio. Hacking will take place in the main hall, and workshops will take place in the various breakouts scattered throughout the venue.

Venue map coming soon!

High Level Schedule

Friday
1:30 PM: Check-in begins
3:40 PM: Cal Band performance
4:00 PM - 6:00 PM: Opening Ceremony

Sunday
9:00 AM: Submission deadline
10:30 AM - 12:30 PM: Judging
2:00 PM - 4:00 PM: Closing Ceremony
4:00 PM - 5:00 PM: Winners' photos

Hacker Buses

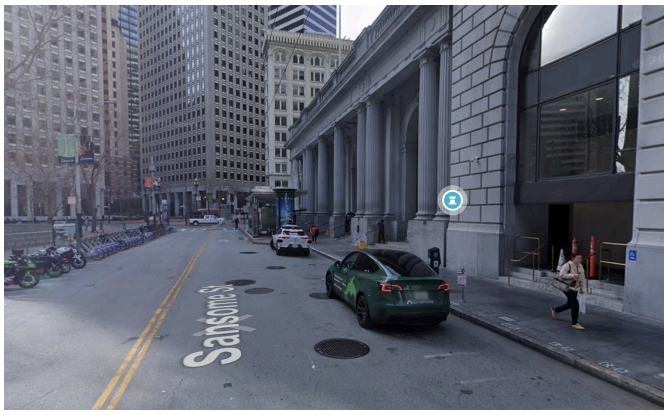

We will be offering a free bus from Montgomery BART station to the Palace of Fine Arts for hackers **(Interval ~15 min, travel time ~20 min)**. Details are as follows:

Friday: Montgomery BART ➔ Palace of Fine Arts

First bus departs: **1:00pm**

Last bus departs: **5:30pm**

Pick up at: **the corner of Sansome & Sutter Street**. Look for Hackathons @ Berkeley directors for guidance.

Sunday: Palace of Fine Arts ➔ Montgomery BART

First bus departs: **3:00pm**

Last bus departs: **6:30pm**

Pick up at: **Palace Drive**. Look for Hackathons @ Berkeley directors for guidance.

Alternate Parking & Transportation

Public Transit

The venue is easily reachable by public transit! If you're traveling from outside San Francisco, we recommend taking the BART into the city and taking a Muni or Golden Gate Transit bus to the venue.

Rideshare

Due to the large number of attendees, and limited roads leading into the Palace, we recommend getting dropped off a 5-10 minute walk away. There will be no drop-off zones near the venue otherwise.

Driving

There will not be hacker parking at the venue. There will be a very limited number of public parking spaces available at the Presidio Lot, but most spaces will be reserved for sponsors. We reserve the right to tow away any unauthorized vehicles on the property, so please plan to park at a city lot nearby if you plan on driving.

Food Schedule

Here is a general overview of the food that will be served at the event.

- ➔ Friday Dinner: El Burrito Express 🌯
- ➔ Friday Late Night Snack: Do-Re-Mi Onigiri 🍙
- ➔ Saturday Breakfast: Noah's Bagels 🥯
- ➔ Saturday Lunch: Banh Mi 🥖
- ➔ Saturday Dinner: Korean Papi's Kitchen Tacos 🌮
- ➔ Saturday Late Night Snack: Pineapple Buns 🍍
- ➔ Sunday Breakfast: Early Bird Tacos 🌮
- ➔ Sunday Lunch: Ike's Sandwiches 🥪

We will have options for those with dietary restrictions! Please see this link for the full food menu & list of allergens: Cal Hacks 13.0 Menu

Hacker Checklist

You will need to present a government-issued ID showing date of birth, **as well as your Hacker Pass**, in order to check-in to the event. You must download the **Hackathons @ Berkeley App** from the App Store or Play Store in order to access your Hacker Pass (more on that below). **We recommend adding it to your Apple Wallet or Google Wallet** for ease of access as you will need it throughout the event.

Though we're excited to have you, it is NOT MANDATORY to stay overnight. Feel free to work out your own sleeping arrangements (going to Berkeley, staying with a friend, purchasing a hotel room, etc.) OR join us overnight in the venue!

Please note we are **NOT reimbursing any hotel/overnight expenses.**

Packing list & prohibited items list:

Items we recommend bringing!

- Government-issued ID with DOB (required)
- Your Hacker Pass (saved to mobile wallet)
- Laptop & charger
- Power bank
- Headphones
- Reusable water bottle
- Sleeping bag / air mattress
- Towel + body wash (we will have showers!)
- Personal hygiene items, change of clothes
- Ethernet to USB-C adapter (if desired)

Prohibited items

No open flames or flammable items, including but not limited to gasoline, gas torches, lighter fluid, etc.
No weapons (guns, knives, pocket knives, fireworks, improvised weapons, etc.)
No items that pose a danger to you or others
No illegal drugs, alcoholic beverages, or tobacco products (including e-cigarettes)
No tents
No animals
No personal hotspots, routers, or equipment that interfere with wireless infrastructure

Hacking

Registration & Team Formation

- ➔ Every hacker must be registered to participate!
- ➔ Teams can be anywhere between **1-4 people**; no more than 4 people allowed under any circumstance.
- ➔ No team? No problem! Hop into the #1-team-formation channel on Slack, **use the Team Matching feature in the app**, and pull up to our in-person team mixer event after the Opening Ceremony!
- ➔ Make sure to add your teammates on Devpost during submission. **No other confirmation is required to formally create a team.**

Project Submission & Judging

All completed hacker projects must be submitted on **Devpost BY 9:00 AM,** on Sunday morning. ***Late projects will not be considered for judging, and you MUST be in-person at the venue for the judging period to be eligible for judging***. Shortly after the 9:00 AM submission deadline, all projects will be assigned a table number. You will need to move to your assigned table by 10:30 AM in order to be judged. Each table will be shared by 2-3 teams.

All projects must be started during the event. Sadly, we disqualify a number of entries every year for violating this rule. Your project should also follow the MLH Code of Conduct.

We highly recommend that you submit an initial draft of your project on Devpost by Saturday night, and continue editing your submission until the deadline, to avoid missing the deadline.

Judges will visit project teams between **10:30am to 12:30pm**; this will be your chance to show off the amazing projects you've built! **You must stay at your table for the full judging window! If your entire team is not present while a judge comes, you will not be judged!** We recommend preparing a two-minute pitch and any answers to possible questions! Hacks will be judged on a variety of factors, including impact, quality,

technical complexity, and creativity. Our judges know that two days is a short timeframe and that many of our hackers are beginners, so don't feel pressured to create the next BeReal — rather, we love to see projects that creatively attempt to tackle a problem, and care more about the idea, genuine effort, and thought process behind the project rather than the final product. That being said, **your pitch will require a live demo** in order to judge the actual functionality of your project.

Information about the prize tracks being offered can be found below!

Communication

Slack will be your primary source for announcements, mentorship, team formation, and more. Please join Slack (*with the email you used to apply*) if you haven't already!

Click Here to Join Slack!

- ➔ Got a question for mentors? Head to #1-ask-mentors for help, or meet them in-person at the Mentor Tables!
- ➔ Here are some ground rules for Slack:
  - ◆ DO NOT @channel in any public channel. This will ping every single person in Slack and is reserved for directors to make announcements.
  - ◆ Ask questions in #0-ask-directors, and only directly message directors for emergencies
  - ◆ Treat others with kindness! Toxic or hateful messages will not be tolerated, and anyone breaking the Code of Conduct / ground rules will be removed from the hackathon.
  - ◆ Use threads when you can to keep relevant topics in one message.
  - ◆ Use the search function in #0-ask-directors! Your question may have already been answered!

Digital Hacker Pass

Your Digital Hacker Pass will be your ticket throughout the weekend for anything requiring check-in, **please download it beforehand**! Do NOT share your Hacker Pass with anyone else.

The Hackathons @ Berkeley app is required to download this pass (see below!).

Hackathons @ Berkeley App

The Hackathons @ Berkeley App is the **official companion app** for Cal Hacks 13.0! You can use it to bookmark events for reminders, explore venue maps and event locations, **access your Hacker Pass**, and more.

Please download the app now at one of the following links (or by searching "Hackathons @ Berkeley" in the app store). **Make sure to sign in with the email you use on Hive in order to access the full app features, and to view your Hacker Pass.**

- App Store: **https://apps.apple.com/us/app/hackathons-berkeley/id6761351929**
- Play Store: **https://play.google.com/store/apps/details?id=io.calhacks.hive**

Important: After downloading the app, please tap on the **profile icon in the top right → press "check for updates"** to ensure the app is up to date.

Cal Hacks Prizes

We will be offering the following general prizes for the hackathon. This list is subject to change up until event day.

Track Name	**Prize(s)**
First Overall	MacBook Air 13" M5
Second Overall	Nintendo Switch 2
Third Overall	Google Intelligent Eyewear
Most Creative Hack	Instax camera plus film
Most Technically Complex Hack	NuPhy Air60 HE
Best People-First Hack	Apple Watch SE 3
Best Planet-First Hack	America the Beautiful Parks Pass
Best Hardware Hack	Bambu Lab A1 Mini
Best Beginner Hack	AirPods 4
Best Solo Hack	AirPods Pro 3

Hacker's Choice	Logitech MX Master 4

Sponsor Tracks

Many of our sponsors are offering prize tracks for the best & most creative uses of their tools. These are summarized below. More information, including track criteria and the **Hacker Starter Pack** for each track that you will need to get started, will be posted on our Live Site at the start of the hackathon. Note that these prizes are subject to change.

We highly encourage you to participate in at least one sponsor track! Our sponsors bring immense value and state-of-the-art technologies to your hackathon experience that will be at your fingertips this weekend. Furthermore, sponsors very frequently recruit straight from students they meet at hackathons!

Track Name	Track Criteria	Prize(s)
Best Use of Notability (Notability)	**Process**: Do your notes show how the idea evolved, from first sketch to final build? **Detail**: Are your notes clear and thorough enough that someone else could follow your thinking? **Feature Usage**: Does it take full advantage of Notability's features, like handwriting, audio, diagrams, PDFs, and Smart Notes? **Relevance**: Did Notability play a real role in your build, or was it added after the fact?	1 year of Notability Pro + exclusive company merch
Meta/Facebook: Bringing People Closer Together with AI (Meta Inc)	Projects will be judged on how meaningfully they strengthen human connection, how essential and well-integrated AI is, originality, and the strength of the working demo.	Invitation to advance to the Round 2 Hackathon hosted at Meta's Menlo Park campus (travel and accommodations provided; advancement subject to eligibility verification and compliance with Meta's Round 2 Official Rules); Meta swag bag
Best Use of Nessie (Capital One)	Completeness, Creativity, Complexity	$300 Giftogram per person on winning team
Best Use of the Factory Droid SDK (Factory)	**Eligibility**: The project must use the Droid SDK (TypeScript or Python) in a meaningful way. Droid	$2000 cash, Factory credits, and swag

	should do real work in the running product, not just help you write code. The repo README should explain where and how Droid is used. **What scores well** - Droid runs on a trigger you designed, like an event, a schedule, a user action, or another agent. - Thoughtful control over what Droid can touch, with safety built in. - Making Droid's work visible: plans, steps, diffs, and results. **What scores poorly** - A chatbot wrapper with Droid added on. - Demos that only work in slides. - Projects where we can't tell what the agent did."	
Best Use of Fetch.ai (Fetch.ai)	https://www.fetch.ai/events/calhacks-13-0	1st Prize - $1500; 2nd Prize - $1000; 3rd Prize - $500
Best Security Hack, sponsored by Armadin (Armadin)	Coming soon!	Apple Headphones (possibly hacking tools)
Best Use of x402 by Coinbase (Coinbase)	https://drive.google.com/file/d/12TnPLguduV3gh1zY_TJ176XmVDz2RGW9/view?usp=sharing	$500 USDC + recruiter call per team member per track, for each of the two tracks (up to $4000 total)
Best AI-First Disruptor (Creao AI)	https://community.creao.ai/CalHacks2026?utm_source=calhacks13-2026&utm_medium=hackathon&utm_campaign=hackathons-oct-2026	$5000 total cash prize across the tracks; each winning team is invited into CREAO Launchpad: 1 year of CREAO Pro Max ($1,440 value), product/technical/founder mentorship, CREAO meet-and-greet, demo opportunities, launch support and amplification, and career/interview opportunities with CREAO
Best One-Person Company (Creao AI)	Same as above	$5000 total cash prize across the tracks; each winning team is invited into CREAO

		Launchpad: 1 year of CREAO Pro Max ($1,440 value), product/technical/founder mentorship, CREAO meet-and-greet, demo opportunities, launch support and amplification, and career/interview opportunities with CREAO
Best Team Empowerment (Creao AI)	Same as above	$5000 total cash prize across the tracks; each winning team is invited into CREAO Launchpad: 1 year of CREAO Pro Max ($1,440 value), product/technical/founder mentorship, CREAO meet-and-greet, demo opportunities, launch support and amplification, and career/interview opportunities with CREAO
CRS Financial Intelligence Challenge (Best Use of CRS Credit API) (CRS Credit)	The only rule: make meaningful use of the CRS sandbox and show it working live in your demo. **Judging criteria:** 1. Use of CRS: how central CRS data is to the product, not a bolt-on. 2. Working demo: it runs live against the sandbox. 3. Usefulness: it solves a real problem for a person or a business. 4. Creativity: it shows us something we didn't expect. **Prizes:** - Best Overall CRS Hack ($1,000): the most impressive product built on CRS. - Best Financial AI Agent ($500): an AI agent that does real work with CRS data, using our API or MCP server. - Best Identity / Fraud Innovation (interview with	Best Overall CRS Hack: $1,000 (per team); Best Financial AI Agent: $500 (per team); Best Identity / Fraud Innovation: interview with the CRS team for open forward-deployed engineer role, for each team member; Most Unexpected Use of CRS: interview with the CRS team for open forward-deployed engineer role, for each team member

	CRS): the best project protecting consumers or businesses from fraud and identity theft. - Most Unexpected Use of CRS (interview with CRS): the ""we didn't think of this"" prize. Getting started: sandbox keys, docs and test identities are at https://calhacks.crscreditapi.com. Use the provided test identities only. Questions: find us at the CRS booth. We'll connect with the winning teams through Cal Hacks.	
The Hyphenated Enterprise: Autonomous Systems for Finance (Hyphenate)	Every submission is judged on the same four questions: 1. **Is it real enough?** Realistic data, a messy problem, and proof that it works. 2. **Would you hire it?** For which seats, and would it earn them: limited access, a clean record of its work, and knowing when to ask? 3. **Did we see something new?** A company, problem or approach we haven't seen made autonomous before. 4. **The moment.** When it catches what others missed, recovers from something going wrong, or defends a decision when questioned. Teams should bring a demo video that opens with their moment, a live demo at judging (we may ask them to try a scenario of our own), one line on the seats their system fills, and proof it works: what's real, what's simulated, and how they know. More details here: CalHacks_Hyphenate_Track	Cash prizes of $8000, $5000, $3000 for the top 3 teams; expedited interview process for top 5 teams
Best Use of Cartesia (Cartesia)	Build a useful voice experience with Cartesia. Voice should be core to the product–not just a feature added for the demo. Other tools are fine; make clear what Cartesia contributes. **What to submit** • A working demo • A 2-minute, demo-first presentation: one complete user flow, then a brief problem + how you built it • A short README: setup, Cartesia features used,	Meta glasses (still TBD)

	known limitations • Source access for judges (per event rules). No API keys or secrets in the repo **Judging criteria (25% each)** **Problem and originality** — Useful, clearly scoped, thoughtfully designed? **Use of Cartesia** — Meaningfully integrated into the core experience? Voice clear, responsive, and natural? **Execution** — Main flow works? Likely edge cases handled? **Impact and responsibility** — Accessibility, privacy, and responsible use considered? We'll favor a strong working prototype over a large unfinished idea. **Ideas** • **Commute standup** — voice-only morning brief you can interrupt while driving (hands-busy) • **Ambient / wearable assistant** — help without pulling out a phone • **Keep-your-voice accessibility** — clone for reading aloud or speaking another language • **Live coach or translator** — low-latency back-and-forth where voice quality matters • **Multi-speaker agent** — tutor, debate partner, or support sim with distinct voices Docs: https://docs.cartesia.ai Playground: https://play.cartesia.ai	
Best Use of Bitdeer AI Model Studio (Bitdeer AI)	Challenge: Best Use of Bitdeer AI Model Studio Build an AI-powered application using Bitdeer AI Model Studio. Projects may include AI agents, developer tools, productivity applications, creative experiences, or other innovative applications. **Eligibility requirements**	1st Place: $500 in Bitdeer AI Model Studio credits for the winning team + four gaming mice, one per teammate; 2nd Place: $200 in Bitdeer AI Model Studio credits + one LEGO Technic set for the team to share

	Build a working project using Bitdeer AI Model Studio. Clearly demonstrate how Model Studio is used in the application. Submit a brief description of the project and how Model Studio was used. Provide a demo or presentation of the project. **Judging criteria** Innovation and Creativity — 30% Technical Implementation — 30% Use of Bitdeer AI Model Studio — 20% Impact and Presentation — 20% Judges will evaluate originality, technical execution, meaningful use of Model Studio, and the project's potential value or user impact.	
TBD (Figma)	https://docs.google.com/document/d/1HjzThDGveSLiilIdEPEHq12ZVLZ5eS0T8CQC5_m_-rg/edit?usp=sharing	Amazon Gift Cards (distributed by CalHacks orgs); session with Figma Early Career Recruiting Team [to be scheduled]
Best Use of Moss (Moss)	We have 3 main examples we are looking for: **1 - Voice AI:** Voice agents that listen, respond, and act in real time **2 - Personal Agent:** Agent that remembers you, works across your apps, and autonomously handles everyday tasks. **3 - Social Post:** Best engagement	Airpod Max/pros
Make it Legendary with SpaceXAI (SpaceXAI)	Space gives you more to work with than almost any other field. You have access to enormous public datasets, decades of missions, and a literature no human can read all of. Real space data goes in and a legendary project comes out. To be eligible, your project must be built with Cursor. The more you use Cursor, the more you're likely to win. You must also use the Grok Imagine or Voice API in your project. Bonus points, if you use Grok Bot for project	Custom Cursor Mechanical Keyboard

	planning and team collaboration.	
Best use of Convex (Convex)	Agent, healthtech, fintech, hardware, or full-stack side project. Build it on Convex: database, functions, workflows, sync, search, and file storage in one TypeScript backend that updates live. Use real Convex features like live queries and components to win.	$5,000 cash to the winning team
Grand Prize: Built for the Real World (Microsoft)	**Track Challenge**: Build a production-minded AI agent that solves a meaningful problem in finance, productivity, healthcare, or another high-impact domain **Judging Criteria**: • Customer understanding • Measurable usefulness • Path from prototype to production • responsible design • end to end functionality	A Microsoft Surface laptop for each member of the winning team; present your project remotely at a Microsoft Delta/Frontier Co. FDE team tech talk; 1:1 mentorship with senior FDEs from the Delta/Frontier Co team
Microsoft Customer Impact Award (Microsoft)	Same as above!	Present your project remotely at a Microsoft Delta/Frontier Co. FDE team tech talk; 1:1 mentorship with senior FDEs from the Microsoft Delta team
Best use of Apify (Apify)	Top 5 projects using Apify, we also have a best actor award for building an actor for this event. Project must be using Apify in a meaningful way. We will judge the quality of the project as well as other criteria.	$5,000 total: 1st) $2,000; 2nd) $1,000; 3rd) $800; 4th) $400; 5th) $400
Best Actor sponsored by Apify (Apify)	Same as above	$400
Elastic	Coming soon!	1st Place: Meta Quest 3S headsets; 2nd Place: Bose QuietComfort headphones
Best use of Reimagining Shopping sponsored by Visa (Visa)	**Innovation (25%) –** How creative does the solution reimagine the shopping experience? **User Experience (25%) –** Does the experience feel intuitive, useful, and seamless? **Technical Execution (20%)** - How effectively has	$5,000

	the team implemented AI and supporting technologies? **Commerce Impact (15%)** - Can the solution improve customer engagement, conversion, loyalty, or merchant outcomes? **Trust & Responsibility (15%)** - Does the solution address privacy, transparency, security, and responsible use of AI?	
Anthropic	1. **A named community**. ""Students"" is too broad. ""Transfer students at Berkeley trying to find housing"" is the right register. 2. **A real problem**. You have lived it, or you talked to someone who has. 3. **It works**. One thing done well and usable on Monday beats a broad demo. 4. **Thoughtful use of Claude**. Claude does something that matters to the solution, and you know where it could go wrong for the people using it.	$5,000 in Claude credits + 1Y Claude Max 20x + Office Hours
Atlassian	The Atlassian Agentic Workforce Challenge [...	Airpod Max
Bright Data	1st - $1500 Bright Data credits, $500 amazon card 2nd - $1000 Bright Data credits, $350 amazon card 3rd - $500 Bright Data credits, $250 amazon card	Judges will look for products where Bright Data is essential to the core experience; if live public web data were removed, the product would no longer work. Strong submissions solve a clear, real-world problem for a specific user, run live in the demo, handle real web conditions like blocks, slow responses, and empty results, and turn raw data into clean, useful output. Extra credit goes to teams

		that choose the right Bright Data tools thoughtfully, combine them where it improves the solution, and tell a clear two-minute story using real results from real websites rather than mocked data. Submissions will be disqualified if they scrape behind a login or paywall, collect non-public personal data, use mocked or hardcoded data in the demo, or mention Bright Data only in the README without making it part of the working product.
Mana.space	Use Mana meaningfully while building your project. In your submission, say where Mana helped and link one or two Mana pages or chats you used: the app or prototypes you built in Mana, and the chats where Mana planned, wrote or debugged your code. Make each link public so judges can open it (every Mana page and chat can be shared). In your demo, show one moment where Mana changed what you built or how fast you built it. What we'll be looking for: - **Meaningful use of Mana (30%):** Did Mana let you build something better, or faster, than you could have without it? - **Usefulness (25%):** Would a real person want this? - **Originality (25%):** Is it something we have not seen before? - **Execution (20%):** Does it work live, and could someone else use it?	$5,000

	- **Bonus (up to +10):** Your project lives inside Mana as an app or agent a judge can open and use. A small thing that works beats an ambitious idea that only exists in slides.	
Spacetime	We'd love to see projects where Spacetime is the core real-time backend, especially anything with live shared state, multiplayer interaction, or instant sync between users/agents/systems. That makes it a great fit not just for games, but also for things like chat/community apps, collaborative tools, social experiences, AI agent coordination, live dashboards, trading / financial-style apps, auctions / marketplaces, shared simulations, multiplayer productivity tools, and stream/creator tools. SpacetimeDB's docs position it around real-time subscriptions, transactional updates, and server-side logic running close to the data, which is why these kinds of apps fit well. We'd be excited by something like a real-time portfolio sim, prediction market, collaborative trading game, shared ops dashboard, multi-user planning tool, or AI systems coordinating in a persistent world state. The main thing we'd want is for SpacetimeDB to be meaningfully used, not just added on the side. A few cool examples already built with / around Spacetime: BitCraft Online / BitCraftPublic Elegon Pogly - a real-time collaborative stream overlay powered by Spacetime official chat app tutorials/templates Video chat app	1st place: $2,048, 2nd place: $1,024, 3rd place: $512

Workshops & Entertainment

Workshops

Many of our sponsors will be running workshops throughout Saturday. They will be introducing how to create a project using their tools, explaining their prize track, and many of them will be providing credits and swag. We highly recommend you to attend as many of them as possible!

The following sponsors will be running workshops. The detailed schedule and workshop descriptions will be viewable on the **live site** and **app** once it's released!

Sponsor	Workshop Title
Anthropic	Intro to Claude Code: Boost Your Coding Workflow
Meta	From Chatbots to Agent Teams: Agentic Engineering at Meta
Capital One	Nintendo Smash Bros Tournament
Factory	Shipping with the Factory Droid SDK
Fetch.ai	Build, Deploy & Monetise AI Agents with Fetch.ai
Creao AI	From Chat to Backend: Build an AI Agent You Can Call From Code
Hyphenate	Beyond Agentic Harnesses: Engineering the Autonomous Enterprise
Bitdeer AI	Supercharging Your Hackathon Project with Bitdeer Model Studio

Figma	From Canvas to Shipped: How to Differentiate in the Age of AI
Moss	Retrieval in 6-7ms w/ Moss
SpaceXAI	Build Your Entire Internship Application Stack in 30 Minutes
Convex	Build Your Backend with Convex
Microsoft	System Design for Deployed Agents
Apify	Apify is your superpower for hackathons.
Elastic	Build an Agent That Does the Research: Context Engineering with Elasticsearch
Visa	Fireside Chat: AI and Security in Digital Payments
AfterQuery	Coming soon!
Annapurna Labs	Technical Domain Talk!
Bright Data	Coming soon!
SpacetimeDB	Coming soon!

Entertainment

The following entertainment events will be taking place:

- ➔ Clash Royale Tournament (Friday night)
- ➔ Midnight Run (Friday night)
- ➔ Silent Disco (Friday night)
- ➔ Poker Tournament (Friday night)
- ➔ Sunrise Hike (Saturday morning)
- ➔ Haunted House Making (Saturday evening)
- ➔ Karaoke (Saturday night)

...and more! Please refer to the **live site** for exact event times and locations.

Additionally, keep an eye out for passive entertainment events happening throughout the weekend such as a photobooth, Airline Adventures tasks, and more!

Airline Adventures

This year, attending workshops, entertainment events, and other activities will earn you points in our Airline Adventures program! You can redeem your points for **limited-edition swag** at the **Hardware & Airline Adventures desk** on the Mezzanine! Keep track of your points in the Hackathons @ Berkeley app.

More information about this program will be released closer to the event!

Hardware

We are excited to announce several opportunities to work on hardware projects at Cal Hacks 13.0! For specific requests, please complete the Hardware Request Form. A complete list of hardware will be available in the Hackathons @ Berkeley app, closer to the event.

Cal Hacks Hardware Rental Booth

List of parts offered:

- Arduino Uno Kits
- Raspberry Pis & Raspberry Picos (including HDMI cable & MicroSD card)
- ESP32s
- MPU6050s
- Assortment of common sensor modules for microcontrollers

The Hardware Rental Booth will open at the end of opening ceremony at 6 PM on Friday. All parts will be due back by the start of closing ceremony at 2 PM on Sunday.

3D Printing Station

We will have five 3D printers and PLA filament in an assortment of colors! There will be a form to get in queue to use these. Prints are limited to 3.5 hours each.

Soldering

We **will not** have soldering irons and you **are not** permitted to solder inside the venue due to venue rules.

MLH Hardware Lab

Raspberry Pi Kits, Arduinos and Base Shields, Logitech Webcams, Google Home Mini, SenseCAP Indicator, Echo Show, Echo Dot, and more! A complete list of parts offered can be found here.

ASUS

ASUS will be providing 30 ASUS Ascent GX10s for rental at the event! Find their table at the event if you are interested.

Seeed reBot Arm

Seeed will be bringing 2 reBot robot arms, with 2 teams sharing each arm. Due to the limited number of arms, please fill out this application form by EOD Thursday (10/22): https://forms.gle/QT5ja8UdDJ1wYV7E7

Emergency Information

If there is an emergency or immediate threat to life, **call 911.**

The nearest hospital is **Kaiser Permanente San Francisco Medical Center,** located at **2425 Geary Blvd**.

We will not be providing any form of medication other than basic first aid in cases of emergencies. Please bring your own medication if you require any.

For immediate hackathon-related emergencies, contact a director through the **#0-ask-directors** channel on Slack. If it's a serious emergency or involves private information, only then should you PM a director for more immediate assistance.

For non-urgent situations or questions, seek out a Cal Hacks **director** (wearing a white shirt) or ask in the **#0-ask-directors** channel on Slack. We'll point you in the right direction!

FAQs

➔ **Do I need to show up for all 3 days?**
While the Cal Hacks experience is incomplete without attending the entirety of the event, you can arrive late or leave early if you have other commitments.

➔ **I have a dietary restriction. Will Cal Hacks be able to accommodate?**
We will be offering vegetarian options as a part of our meals! Due to the vast variety of dietary restrictions, however, we are unable to completely account for specific allergies or restrictions. For non-vegetarian hackers, we ask that you avoid grabbing vegetarian meals if possible to ensure vegetarian hackers are able to eat! Please refer to our food menu for detailed allergen information. If you have concerns about allergies/GF please reach out to a director and we can assist.

➔ **Are hackers required to stay overnight?**
Nope! Some of our hackers are returning to Berkeley for the night, or staying in different nearby hotels. Though staying overnight is a hackathon tradition, do whatever you feel most comfortable with! Our sleeping areas will be divided into a men's and women's sleeping area to provide hackers more privacy.

➔ **Will Ddoski (aka. huge teddy bear + our beloved mascot) be there?**
It wouldn't be Cal Hacks without him. He's grown a lot since you last saw him!

➔ **I lost something or found something someone lost, is there a lost and found area to retrieve or deposit it?**
Yes! Come down to the front concierge desk where directors will be stationed to help you retrieve anything that has been deposited at the desk.

➔ **Is there wifi at the event?**
Absolutely! The wifi name is "Cal Hacks 13.0", and the password is "hackers!"
